

Duke Gardens Summer Fun at Home: Gardening with Community

## **FAMILY DISCUSSION GUIDE: THURSDAY**

All of the activities that are a part of Gardening with Community provide ways to try hands-on gardening in a variety of contexts, as well as exploring how gardens can create healthy communities for plants, animals and people. We are providing this discussion guide for adults to help inspire conversations with your children and connect the activities to the weekly theme.

### **Today's activities included:**

- Seed Search & Germination Experiment
- Seed Mosaic

### **Questions to prompt discussion:**

- What seeds did you find outside?
- What seeds did you find inside?
- What is your mosaic design?
- Did you find seeds in any surprising places in the kitchen?
- What seeds are you trying to germinate?  
Which ones do you think will sprout?
